CAREER OBJECTIVE

I am a front-end UI developer with a passion for creating accessible and pixel-perfect user experiences.

I last consulted as a UI developer at Projekt202, working on large-scale projects for a fintech company such as Union Bank. I have built React applications in fast-paced agile environments, collaborating with the design team, product owner, and clients to deliver high-quality solutions. I have contributed to the creation and maintenance of component libraries and design systems, as well as CRM for academic agents. I am a fast learner and can pick up new technologies on the fly. I am always excited to embrace new frameworks or dive into back-end code, as learning develops my skills as a developer.

I work exceptionally well on a team, and I am known for being friendly and helpful. I support my peers by conducting code reviews, unit testing, and daily sprint ceremonies and I ensure that my code meets the standards and best practices for web accessibility. My goal is to create user experiences that are not only beautiful, but also functional and accessible for everyone.

SKILLS

HTML5

CSS3

SASS

JavaScript

TypeScript

React

NextJS

NodeJS

Git

SupaBase

MongoDB

Redux/Context API

Express

EXPERIENCE

FRONTEND DEVELOPER - CONTRACTOR

Upwork -Remote, May 2023 - Date

Clients: Insight for Living, Dashing Fashion (e-commerce platform)

- Redeveloping ecommerce web application using React, Typescript, NEXTJS.
- Working on the mobile app using React Native and TypeScript with the same API for the web app.

UI/FRONTEND DEVELOPER, DALLAS, TX

Stellar Elements an Amdocs Company - Full Time Remote, June 2021 - May 2023

Client: Union Bank (MUFU)

Consulted as a front-end developer to deliver accessible user experiences.

- Collaborated with design team, product owner, and clients to create a component library and design system.
- Created and maintained component libraries using React, TypeScript, Storybook and Sass for styling.

- Created 30+ accessible, feature-rich, reusable components with Storybook documentation.
- Implemented AWS deployments and hosting to modernize company cloud infrastructure.
- Wrote usage documentation for other teams using these components.
- Wrote Unit tests using Jest, React Testing Library and Vitest to ensure the UI components work as expected.
- Developed custom UI in React for testing authentication with the Access Management Team.
- Implemented the frontend for (voice/sms) OTP using transmit security.
- Translated flat figma design files to clean, accessible, and interactive user experiences.
- Used Bitbucket version control systems to manage source code repositories in a team environment.
- Identified and resolved browser compatibility issues across different devices and browsers.
- Collaborated closely with the back-end developers to integrate API calls into the front-end codebase.
- Debugged and fixed Jenkins CI/CD code pipeline failures.

FRONTEND DEVELOPER, DALLAS, TX

Academic Partnerships · Contract, December 2020–July 2021

- Developed web pages and applications using HTML5, CSS3, JavaScript, some .NET and C#, WordPress and Elementor for partner Universities.
- Converted static figma designs into functional, intuitive, and interactive web pages.
- Optimized website performance by reducing page load time and improving efficiency of AJAX requests.
- Wrote functional requirement documents and specifications.
- Maintained graphic standards and branding throughout the product's interface.
- Promoted usability best practices.
- Built custom widgets to enhance user engagement on webpages.

WEB DEVELOPER, REMOTE

OAA Study, February 2017–December 2020

- Created and optimized corporate applications using HTML5, CSS3, JavaScript, React, Redux Context API, React Native, NodeJS, Express, MongoDB, Laravel, WordPress, Elementor, WooCommerce and other technologies.
- Developed the frontend of various applications including a CRM for academic agents to collect and analyze student data for admission into top Universities around the world.
- Created eye catching and functional digital design concepts across various platforms to strengthen company brand and identity.
- Determined coding requirements for site creation, including e-commerce capability and specialized scripts.

WORDPRESS DEVELOPER, REMOTE

Greenwich Media, November 2016–December 2017

- Converted figma design assets into component-based HTML, CSS, and JavaScript.
- Leveraged strong understanding of WordPress and Elementor to create web pages, landing pages and manipulate admin and theme components.
- Installed required plugins and additional coding to fit final design and functionality requirements.
- Collaborated with Project Manager on project specifications, strategy, and execution to build new WordPress pages and update existing ones.

- Created and updated re-usable code libraries to streamline WordPress development cycle.

FRONTEND DEVELOPER – FULL TIME, LAGOS, Nigeria

Dobox.tv, November 2015–November 2016

- Developed user-oriented visuals and features using front-end languages, including HTML5, CSS3, Bootstrap Framework and jQuery/JavaScript.
- Completed full redesigns of existing websites to improve navigation, enhance visuals and strengthen search engine rankings.
- Conceived and built optimized landing pages in HTML, CSS and JavaScript including with mobile first approach and strategy.
- Collected, defined, and translated user requirements into project designs and implementation plans.
- Tested websites and performed troubleshooting prior to deployment.
- Planned and engineered RESTful web services to manipulate dynamic datasets.
